

IT ONBOARDING CHECKLIST MANUAL

Phase 08: Documentation

Employee IT Onboarding Procedure

Document ID: P07-DOC-ONB-001 | **Version:** 1.0 | **Owner:** IT Support Team | **Classification:** Internal Use

Purpose:

Provide a controlled, repeatable process for preparing accounts, equipment, software, access, security controls, and user guidance for new employees.

1. Purpose and Scope

This manual defines the standard IT onboarding workflow for new employees, contractors, interns, and other authorized personnel. It covers request validation, identity/account provisioning, hardware assignment, software installation, network and application access, security configuration, user orientation, verification, and closure.

2. Onboarding Principles

- Provision only the access required for the employee's approved role.
- Complete approvals before granting non-standard or privileged access.
- Use approved systems and secure methods for account and credential delivery.
- Record assigned assets and access changes accurately.
- Verify every critical account, device, and application before closure.
- Never place passwords, MFA codes, private keys, or recovery secrets in the onboarding ticket.

3. Roles and Responsibilities

Role	Responsibilities
HR / Requesting Department	Submit approved onboarding information, role, manager, start date, and business requirements.
Hiring Manager	Approve role-based access, applications, and business resources.
IT Support	Provision standard accounts/equipment, perform configuration, document actions, and verify readiness.
IT Administrator	Handle privileged, infrastructure, or non-standard access and escalations.
Asset/Procurement	Provide equipment and maintain asset ownership/lifecycle records.
New Employee	Complete required orientation, protect

	credentials, and confirm equipment/access functionality.
--	--

4. Required Onboarding Information

Information	Required Details
Employee	Full name and approved employee identifier
Department	Business department/team
Role	Job title and role profile
Manager	Approving manager
Start Date	Effective employment/start date
Location	Approved office/work location or remote status
Equipment	Laptop/desktop, monitor, peripherals, mobile device if applicable
Applications	Role-required software and business systems
Access	Approved network, file, application, and collaboration resources
Special Requirements	Accessibility, approved exceptions, or role-specific requirements

5. Phase A: Pre-Onboarding

Checklist

Check	Status	Owner	Notes
Approved onboarding request received	☐	IT Support	
Employee and manager details verified	☐	IT Support	
Start date confirmed	☐	IT Support	
Role and department confirmed	☐	Manager/IT	
Required applications identified	☐	Manager/IT	
Required access groups identified	☐	Manager/IT	
Equipment requirements identified	☐	IT/Asset	
Non-standard requirements approved	☐	Manager/IT	

6. Phase B: Account Provisioning

1. Create the standard corporate identity using the approved identity-management process.
2. Assign the employee to the correct organizational unit or role profile.
3. Apply baseline groups and policies appropriate to the role.
4. Enable required authentication and multi-factor authentication controls.

5. Configure approved email/collaboration services.
6. Provide initial sign-in information through the approved secure process.
7. Require a password change or enrollment action when the standard process requires it.
8. Verify that the account can authenticate successfully.

Account Verification

- Accounts exist and are active at the correct time.
- Correct department/role attributes are applied.
- Required baseline groups are present.
- Authentication controls are enabled.
- Users can sign in without receiving unnecessary privileges.

7. Phase C: Hardware Provisioning

Item	Checklist
Workstation/Laptop	☐ Assigned ☐ Asset ID recorded ☐ Condition checked
Power Adapter	☐ Assigned ☐ Condition checked
Monitor	☐ Assigned ☐ Asset ID recorded
Keyboard/Mouse	☐ Assigned ☐ Tested
Headset/Webcam	☐ Assigned if required ☐ Tested
Mobile Device	☐ Assigned if approved ☐ Configured
Other Peripheral	☐ Recorded ☐ Tested

Hardware Configuration

1. Confirm the device is an approved model or assigned replacement.
2. Record asset ID, serial number, assigned user, and location in the asset register.
3. Apply the approved operating-system baseline.
4. Install required security and management agents where applicable.
5. Apply approved operating-system updates.
6. Configure standard device settings.
7. Install role-required software.
8. Perform a basic hardware and operating-system test.

8. Phase D: Software Provisioning

Software Category	Verification
Operating System	☐ Supported and updated
Office/Productivity	☐ Installed and activated through approved method
Security/Management	☐ Required controls active
Browser	☐ Approved version/configuration
Role-Specific Applications	☐ Installed and tested
Communication Tools	☐ Installed and signed in

Special Applications	☐ Approval and license confirmed
----------------------	---

Software Controls

- Use only approved software sources.
- Confirm licensing before installation.
- Do not install unauthorized or pirated software.
- Document non-standard software and approval.

9. Phase E: Network and Resource Access

1. Connect the device to the approved corporate network.
2. Verify basic network connectivity.
3. Provision approved file shares, collaboration spaces, printers, and business applications.
4. Apply role-based permissions.
5. Test access using the employee's account.
6. Confirm that access does not exceed the approved business requirement.

Access Verification

Resource	Required	Approved	Tested
Corporate network	☐	☐	☐
Email/collaboration	☐	☐	☐
File resources	☐	☐	☐
Business applications	☐	☐	☐
Printers/peripherals	☐	☐	☐
Remote access/VPN if required	☐	☐	☐

10. Phase F: Security Baseline

- Confirm endpoint security/management controls are active where required.
- Confirm operating system updates are applied or scheduled.
- Confirm screen lock and authentication policies.
- Confirm approved firewall/security settings are active.
- Confirm removable-media and other controls where applicable.
- Confirm the user understands password and MFA requirements.
- Do not disable security controls to complete onboarding.

11. Phase G: User Orientation

1. Explain how to sign in and complete any required MFA enrollment.
2. Explain password and account-security requirements.
3. Explain how to request IT Support.
4. Provide relevant user guides and knowledge-based references.
5. Explain approved file storage and sharing.
6. Explain suspicious email/file reporting.

7. Explain device-loss reporting.
8. Confirm the user understands the basic support process.

12. Phase H: Readiness Verification

Verification Item	Result	Verified By	Date
Account authentication	☐ Pass ☐ Fail		
MFA/authentication enrollment	☐ Pass ☐ Fail		
Workstation startup/login	☐ Pass ☐ Fail		
Network connectivity	☐ Pass ☐ Fail		
Email/collaboration	☐ Pass ☐ Fail		
Role applications	☐ Pass ☐ Fail		
File/resource access	☐ Pass ☐ Fail		
Printing/peripherals	☐ Pass ☐ Fail		
Security controls	☐ Pass ☐ Fail		
User orientation completed	☐ Pass ☐ Fail		

13. Exceptions and Escalation

- Escalate missing approvals before granting non-standard access.
- Escalate unavailable equipment before the employee start date when possible.
- Escalate licensing or application compatibility problems to the responsible team.
- Escalate privileged-access requirements to IT Administration.
- Document all exceptions, owners, target resolution dates, and approvals.

14. Onboarding Closure

1. Review all checklist items for completion.
2. Confirm all assigned assets are recorded.
3. Confirm required access has been tested.
4. Confirm user orientation has been completed.
5. Record unresolved items and their owners.
6. Update the onboarding ticket with completion evidence.
7. Set the ticket to the appropriate completed/closed status.

15. Final Onboarding Checklist

Control	Complete
Approved request verified	☐
Employee details verified	☐
Account provisioned	☐
MFA/security controls configured	☐

Hardware assigned and recorded	☐
Software installed and tested	☐
Network/resource access provisioned	☐
Role-based permissions verified	☐
User orientation completed	☐
Asset register updated	☐
Exceptions documented	☐
Final readiness verification completed	☐
Onboarding ticket closed	☐

16. Security and Privacy Rules

- Use secure channels for initial credentials and account setup.
- Never write passwords or MFA codes in the ticket.
- Do not grant access without appropriate approval.
- Do not copy employee personal or confidential information into unnecessary documentation.
- Use only approved devices, software, and storage.

17. Document Maintenance

Review this manual annually and whenever onboarding processes, identity systems, endpoint standards, security requirements, or organizational roles change.

18. Revision History

Version	Date	Description	Owner
1.0	2026-08-10	Initial professional IT onboarding manual for Phase 07.	IT Support Team
