

IT OFFBOARDING CHECKLIST MANUAL

Phase 08: Documentation

Employee IT Offboarding Procedure

Document ID: P07-DOC-OFF-001 | **Version:** 1.0 | **Owner:** IT Support Team | **Classification:** Internal Use

1. Purpose and Scope

This manual defines the standard IT process for employee departures, including planned resignation, termination, contract completion, transfer, and other approved separation events. It covers authorization, timing, account access, sessions, applications, assets, data ownership, remote access, shared resources, documentation, and final closure.

2. Security and Privacy Principles

- Follow the approved effective date and time supplied by HR or the authorized manager.
- Do not disable or delete accounts before the approved time unless an authorized security procedure requires immediate action.
- Remove access promptly when the approved offboarding time arrives.
- Preserve required business information according to retention and legal requirements.
- Never access an employee's private content beyond authorized business requirements.
- Do not record passwords, recovery codes, private keys, or other secrets in the offboarding ticket.
- Document every significant access and asset action.

3. Roles and Responsibilities

Role	Responsibilities
HR / Authorized Requester	Provide approved separation details, effective date/time, and required instructions.
Manager	Confirm business-resource ownership, data handover, access requirements, and asset recovery.
IT Support	Execute standard account/access actions, recover assets, update records, document evidence, and close the ticket.
IT Administrator	Handle privileged, infrastructure, identity, or exceptional access actions.
Security Team	Handle suspected compromise, urgent access revocation, or security incidents.
Asset/Procurement	Receive and reconcile returned equipment and update asset lifecycle status.

4. Required Offboarding Information

Field	Required Information
Employee	Name and approved employee identifier
Department	Department/team
Manager	Responsible manager
Separation Type	Resignation / termination / contract end / transfer / other approved type
Effective Date/Time	Exact approved access-removal time
Devices	Assigned laptops, desktops, phones, accessories, removable media
Applications	Business applications and services used
Resources	File shares, collaboration spaces, shared mailboxes, systems
Data Owner	Approved recipient/owner for required business data
Special Instructions	Approved exceptions or security requirements

5. Phase A: Pre-Offboarding

Check	Status	Owner	Notes
Approved offboarding request received	☐	IT/Requester	
Effective date/time confirmed	☐	IT/HR	
Manager confirmed	☐	IT/Manager	
Assigned assets identified	☐	IT/Asset	
Applications and access identified	☐	IT/Manager	
Business data ownership/handover identified	☐	Manager	
Special security requirements identified	☐	IT/Security	

6. Phase B: Access and Account Revocation

1. At the approved effective time, disable the standard corporate account using the approved identity-management process.
2. Revoke active sessions and authentication tokens where required and authorized.
3. Disable remote access/VPN access.
4. Remove unnecessary group memberships and application access.
5. Disable access to approved file shares and collaboration resources where applicable.
6. Handle email, mailbox, forwarding, delegation, and retention according to company policy and manager/HR instructions.
7. Record the time and nature of access actions.

Account Closure Verification

Control	Complete
Corporate account disabled	☐
Active sessions handled	☐
MFA/authentication access handled	☐
VPN/remote access disabled	☐
Application access removed	☐
Group memberships reviewed	☐
File/resource access reviewed	☐
Shared-resource ownership transferred where approved	☐

7. Phase C: Privileged and Special Access

Privileged access requires particular care. Confirm all administrative, cloud, database, network, security, service-account, and other elevated access associated with the departing user.

- Identify privileged groups and administrative roles.
- Remove the departing user's privileged access at the approved time.
- Transfer required business ownership through the approved process.
- Do not share or copy privileged credentials into the ticket.
- Escalate unknown or unmanageable privileged access immediately.

8. Phase D: Data and Business Resource Handover

1. Confirm with the manager which business information must be retained.
2. Identify approved files, project spaces, mailboxes, shared drives, and collaboration resources requiring ownership transfer.
3. Transfer or preserve business data using approved methods.
4. Do not delete business information merely because the employee has departed.
5. Document the approved owner or destination of transferred business resources.
6. Follow organizational retention and legal requirements.

Data Protection

IT Support should not inspect personal/private content unless specifically authorized. When a mailbox or storage area requires review, use the organization's approved legal, HR, records, or data-owner process.

9. Phase E: Hardware and Asset Recovery

Asset	Returned	Condition	Asset Register Updated	Notes
Laptop/Desktop	☐	☐ Good ☐ Damaged	☐	

Monitor	☐	☐ Good ☐ Damaged	☐	
Power Adapter	☐	☐ Good ☐ Damaged	☐	
Keyboard/Mouse	☐	☐ Good ☐ Damaged	☐	
Mobile Device	☐	☐ Good ☐ Damaged	☐	
Headset/Webcam	☐	☐ Good ☐ Damaged	☐	
Removable Media	☐	☐ Good ☐ Damaged	☐	
Other	☐	☐ Good ☐ Damaged	☐	

Asset Procedure

1. Compare returned equipment against the asset register.
2. Confirm the asset ID and serial number.
3. Record condition and missing components.
4. Update assigned user/custodian and status.
5. Send damaged or non-functional assets through the approved repair process.
6. Mark assets for appropriate reuse, storage, or disposal according to policy.

10. Phase F: Device Security

- Confirm the device is recovered through the approved process.
- Handle corporate data and accounts according to policy.
- Do not access personal files unnecessarily.
- Prepare the device for reassignment only through the approved IT build/redeployment process.
- Record device status in the asset register.

11. Phase G: Shared Resources

Resource	Action
Shared mailbox	Transfer ownership/delegation or retain according to policy
Shared drive/folder	Confirm business owner and permissions
Collaboration workspace	Transfer approved ownership
Service/application ownership	Assign approved replacement owner
Scheduled tasks/automations	Review and transfer or disable as appropriate
Distribution groups	Remove departing users where applicable
VPN/remote access	Disable
Privileged roles	Review and revoke

12. Phase H: Security Incident Consideration

If the departure is associated with suspected account compromise, data theft, malicious activity, or an urgent security concern, stop the ordinary workflow where appropriate and escalate to the designated security/IT administration team.

- Preserve relevant evidence.
- Do not alter or delete evidence unnecessarily.
- Follow the approved incident-response process.
- Document security handoffs and timestamps.
- Use emergency access-revocation procedures only when authorized.

13. Phase I: Final Verification

Verification	Result	Verified By	Date/Time
Corporate sign-in disabled	☐ Pass ☐ Fail		
Active sessions handled	☐ Pass ☐ Fail		
MFA/authentication access handled	☐ Pass ☐ Fail		
VPN/remote access disabled	☐ Pass ☐ Fail		
Application access removed	☐ Pass ☐ Fail		
Privileged access reviewed	☐ Pass ☐ Fail		
Business data handover completed	☐ Pass ☐ Fail		
Shared-resource ownership reviewed	☐ Pass ☐ Fail		
Assets recovered/reconciled	☐ Pass ☐ Fail		
Asset register updated	☐ Pass ☐ Fail		

14. Offboarding Closure

1. Review every required offboarding item.
2. Confirm all access-removal actions were completed at the approved time.
3. Confirm business data ownership/handover is documented.
4. Confirm all assigned assets are returned or formally accounted for.
5. Record exceptions and unresolved items with owners.
6. Confirm the manager/authorized requester has received the required completion status.
7. Update the offboarding ticket and close it according to support policy.

15. Final Offboarding Checklist

Control	Complete
Approved request verified	☐
Effective date/time verified	☐
Corporate account disabled	☐
Sessions/authentication handled	☐
Remote access disabled	☐
Applications/groups reviewed	☐
Privileged access reviewed	☐
Business data ownership handled	☐
Shared resources reviewed	☐
Hardware recovered	☐
Asset register updated	☐
Exceptions documented	☐
Final verification completed	☐
Offboarding ticket closed	☐

16. Evidence and Documentation Standards

- Record timestamps for important access-removal actions.
- Use screenshots or logs only when they provide meaningful verification.
- Sanitize credentials, tokens, personal information, and unnecessary system details.
- Never place passwords or recovery secrets in the ticket.
- Keep evidence in approved repositories.
- Document failed or partial actions and escalate them rather than silently marking them completely.

17. Document Maintenance

Review this manual annually and whenever identity systems, employee lifecycle processes, asset controls, security requirements, or retention procedures materially change.

18. Revision History

Version	Date	Description	Owner
1.0	2026-08-10	Initial professional IT offboarding manual for Phase 07.	IT Support Team
