

KSA Office IT Support & Infrastructure Management

Phase 07: IT Support Operations

Afaq Business Solutions Co.

Software Installation Standard Operating Procedure (SOP)

1. Purpose

Provide a standardized process for installing approved software on Linux workstations.

2. Scope

Applies to IT Support personnel handling software installation requests.

3. Software Request Workflow

- Receive and log the request.
- Verify approval and business need.
- Check package availability.
- Install software.
- Validate installation.
- Document actions and close the ticket.

4. Software Verification

- Verify package source.
- Confirm package availability using APT.

5. Installation Procedure

- Update package index.
- Install software from the official repository.
- Monitor installation.

6. Post-Installation Validation

- Verify executable.
- Check application version.

- Confirm successful launch.

7. Security Considerations

- Use trusted repositories only.
- Install approved software only.

8. Best Practices

- Document all work.
- Keep packages updated.
- Confirm with the user before closing.
