

# KSA Office IT Support & Infrastructure Management

## Phase 07: IT Support Operations

### Afaq Business Solutions Co.

---

## Disk Space Management Standard Operating Procedure (SOP)

### 1. Purpose

Provide a standardized process for investigating and resolving disk space issues on Linux workstations.

### 2. Scope

Applies to IT Support staff handling storage-related incidents.

### 3. Disk Usage Investigation

- Log the incident.
- Check disk usage with `df`.
- Locate large directories with `du`.
- Identify safe cleanup targets.

### 4. Cleanup Procedure

- Remove temporary files only.
- Avoid deleting critical system or user data.
- Verify reclaimed storage.

### 5. Validation

- Confirm free disk space.
- Verify normal system performance.

### 6. Security Considerations

- Protect user data.
- Follow company policies.

### 7. Best Practices

- Document all actions.
- Close the ticket after verification.
