

KSA Office IT Support & Infrastructure Management

Phase 07: IT Support Operations

Afaq Business Solutions Co.

Module 09: Incident Report

1. Executive Summary

This report documents a controlled access-permissions incident in which a user could not access a required shared HR training resource. Restrictive permissions were identified and access was restored through controlled group ownership and group-read permission.

2. Ticket Details

- Ticket ID: HD016
- Department: HR
- Reported By: Aisha
- Priority: Medium
- Category: Access & Permissions

3. Reported Problem

The user reported that they could not access a required shared HR document.

4. Investigation

- Verified the reported access issue.
- Inspected the controlled shared-resource permissions.
- Identified restrictive file permissions.
- Reviewed group membership.
- Added the support group in the controlled lab environment.
- Updated file group ownership.
- Granted the required group read permission.
- Verified effective group membership.
- Confirmed successful access to the shared training document.

5. Root Cause

The controlled resource had restrictive permissions that did not provide the required access through the intended support group.

6. Corrective Action

- Assigned the resource to the appropriate support group.
- Changed permissions to allow group read access.
- Used least-privilege permissions.

7. Verification

- Verified group ownership and permission bits.
- Verified effective group membership.
- Successfully read the controlled training document.

8. Security Considerations

The remediation was performed against a controlled training resource. No real credentials, secrets, or unrelated system information were required.

9. Ticket Closure

Access was successfully verified after remediation, documentation was completed, and ticket HD016 was marked resolved.
