

KSA Office IT Support & Infrastructure Management

Phase 07: IT Support Operations

Afaq Business Solutions Co.

Module 11: Remote Support Incident Report

1. Incident Summary

This report documents investigation of an internal remote-support access issue using SSH service status, logs, remote connectivity, and controlled secure file transfer.

2. Ticket Details

- Ticket ID: HD018
- Department: IT Operations
- Reported By: Bilal
- Priority: High
- Category: Remote Support

3. Reported Problem

Remote access to a Linux support workstation was reported as unavailable, preventing remote troubleshooting and file transfer.

4. Investigation

- Identified the SSH service available on the controlled workstation.
- Reviewed SSH service status and recent logs.
- Tested SSH connectivity against the controlled workstation.
- Verified an authorized remote session.
- Tested SCP using a controlled test file.
- Verified successful transfer and retrieval.
- Confirmed no unrelated configuration changes were required.

5. Resolution

Remote access and secure file-transfer functionality were successfully verified in the controlled environment. The user was informed that remote support functionality was operational.

6. Evidence & Security

Use sanitized evidence only. Do not include credentials, private keys, authentication secrets, or unrelated sensitive system information.

7. Final Status

Resolved
