

KSA Office IT Support & Infrastructure Management

Phase 07: IT Support Operations

Afaq Business Solutions Co.

Incident Closure & Final Validation SOP

1. Purpose

Controlled procedure for reviewing a completed support incident, validating its documentation and evidence, and closing the ticket.

2. Workflow

- Review the incident ticket for required information.
- Verify investigation and resolution documentation.
- Review supporting evidence and the closure checklist.
- Confirm resolution verification and user communication are documented.
- Confirm unnecessary sensitive information is not included.
- Validate file presence and permissions.
- Approve the incident for closure.
- Change the ticket status from Open to Resolved.
- Perform final Phase 06 structure and file validation.

3. Key Commands

- `find . -type f -print`
- `find . -type f -exec ls -l {} \;`
- `cat Evidence/closure_checklist.txt`
- `cat Reports/Investigation.md`
- `cat Reports/Resolution.md`
- `tree`
- `find . -type f | sort`
- `find . -type f | wc -l`

4. Security Controls

- Use sanitized evidence only.
- Do not include passwords, private keys, tokens, or unnecessary system information.

- Confirm documentation is internally consistent before closure.
- Close the ticket only after resolution has been verified.

5. Completion Criteria

- Ticket is complete.
- Investigation and resolution reports are present.
- Closure checklist is complete.
- Resolution is verified.
- User communication is documented.
- Ticket status is Resolved.
- Final Phase 06 structure and files are validated.
